

Short Rear mudguard and rear light £115

This mudguard has been shortened compared to the heavy long standard version. All the original holes and bumps from the original have been removed and flattened so that the chrome Lucas style light fits correctly.

You can still use the original Triumph indicators and indicator brackets or you can fit your own. This gets over the problem of peeling chrome on the originals.

This fits all versions.

You can use the mudguard with the solo seat or with the original Triumph seat.

You will need to wire up the light and earth the lamp body. The easiest way is to use the original loom and plug from your old mudguard.

This panel is supplied in black gel coat ready for painting but can also be supplied painted, ask for details.
